

To whom it may concern, I am a paid subscriber to xm radio. The services that they offer have a great effect on my daily life as a truckdriver. I use the instant traffic and weather constantly. It helps me avoid traffic problems in the metro area`s. This is just another ploy by the government to slap the truckdriver in the face again. The politicians ought to worry about the big problems they have in front of them and leave a good servicing enterprise alone. we all pay for the sevice so it`s our choice if we listen to it or not. xm radio is the best new service to come along in many years. So please don`t worry about a good service deal with the problems at hand. Hooray for XM
